

DECEMBER 2015

Information at the end of the year.

Dear Distributor,

Year 2015 has been exciting for Kibion with new owners who have as a goal to invest and to build a strong company. As a result of this strategy Kibion has been able to employ more personnel who we are sure will contribute to the growth of the company.

Kibion has also launched and sold the first IRIS Dynamic instruments with great success. We are confident that our high expectations of this new instrument, with your help, will be fulfilled.

Below please find some more specific information.

Medica

We would like to thank you for the interesting discussions at Medica. As always it is very useful to meet in person. We also like to thank you for year 2015 and your contribution to our business and we look forward to the year to come.

Telephone numbers

As Kibion since May is a privately owned company and no longer a part of Orexo, our general Kibion telephone number has changed. The switch board number is no longer in use and also not the fax number. From now on you can reach the Uppsala team on the mobile phones, all numbers you can find on our web under About Kibion/Staff.

Web

We also would like to take this opportunity to remind you about our web. Important information will be posted here and please also don't forget that you can login under Distributor and find useful documents regarding our products and also for example certificates.

On the start page you will find a new post called "Words from the CEO". Here Petter Bäckgren will communicate some thoughts 2-3 times per year. Please take some minutes and read the first communication that has just been added to our web. (<http://www.kibion.com/about-kibion/pressmedia/words-from-the-ceo/ceo-communication-december-2015/>).

Working hours during Christmas and New Year.

The Uppsala office will be closed from December 24th until January 4th. For urgent questions you can always reach us on our mobile phones.

The Bremen office will be closed from 21st of December until January 8th as the company will move to a new address during this time. The new premises are located on Haferwende 31 (instead of 21) just up the road, all other details will stay the same. The service line (+49 160 9094 4520) will be checked in case there are any technical questions.

Finally we would like to send you all our Season's Greetings.

Best regards

KIBION / Ingegerd
